ORCO LEVELER T-330[®]

Description: Efficient leveler / retarder for wool and wool/nylon blends, and acrylic. Because of its high cloud point, this product is especially useful for repairing unlevel dyeings at high temperatures(200 -210°F(~96°C)).

Properties:

<i>Appearance</i> -	Amber, pourable liquid
<i>Odor</i> -	Mild, slightly alcoholic odor
<i>pH</i> -	7.5 - 8.0
<i>Ionic Class</i> -	Cationic / nonionic

Procedures: Dependent on class of dyes, and/or condition of wool or acrylic a starting recommendation would be 0.75 - 2.0% owg.

In many cases when repair work is being performed, adjusting the pH to 6.0 - 7.5 in addition to using 2.0% owg **Orco Leveler T-330** will help migrate the dyestuff and re-level the shade.
