ORCOSET RESIN CN®

Description: **Orcoset Resin CN** is a non-ionic polyvinyl acetate homopolymer developed for the textile industry to produce maximum stiffness to cotton, synthetics and blends. The dry-rate has been modified to prevent excessive build-up on pad rolls, especially in a three-roll stock.

Orcoset Resin CN may be used alone or compounded with other finishing agents such as optical brighteners, starches, or corresponding catalysts.

Properties:

<i>Appearance-</i>	White viscous emulsion
<i>Odor-</i>	Slightly sweet
<i>Ionic Charge-</i>	Anionic/Nonionic

Applications: *Edge Gumming:*
Apply a 1 to 1 blend of water to **Orcoset Resin CN**.

Sizing or Pre-Coat for Book Cloth:
Use **Orcoset Resin CN** at about 12 %.

Procedures: **Orcoset Resin CN** may be used at concentrations ranging from 2.0% owb in the bath for lightweight fabrics to 10.0% owb in the bath for moderately firm hands. For extra stiff hands, as much as 15.0% owb to 20.0% owb on the bath weights is frequently used.

Notes: **Orcoset Resin CN** should be protected from low temperatures when stored and should be stirred thoroughly before use.

Mix with low speed mixer whenever equipment is available.

Protect from excessive heat and freezing temperatures.
