

ECCOSCOUR™ GREENCLEANER DfE

CLASSIFICATION

Environmentally friendly, biodegradable, nonionic detergent and scouring agent. There are no alkyl phenols in this product.

SPECIFICATIONS

Appearance	Clear liquid, slight citrus odor
Density	8.2 lbs./gallons
pH 0.5% Solution	9.9 +/-1.0
Solubility	milky opaque solution
% Active	100%

GENERAL COMMENTS

- Scientifically formulated biodegradable, concentrated, nonionic detergent and scouring agent for natural and synthetic fibers, fabrics and surfaces.
- Especially effective for the removal of grease & lanolin from felts & raw wool including dirty matter in Alpaca fibers.
- Contains citrus oils and organic linear alcohol surfactants most useful in general scouring needs for removing oils, greases and soil problems.
- Does not contain any petroleum or chlorinated solvents, alkyl phenols, phosphates, or other chemicals that are hazardous to the environment.
- Made from products that have positive environmental characteristics and are easily biodegradable.

STABILITY

- Completely stable to normal storage
- Will tolerate freeze and thaw cycles.

APPLICATIONS

Wool Scour

- Use 0.1 – 0.7 % **ECCOSCOUR™ GREENCLEANER DfE** on weight of bath.
- Scour @ 130 - 160 °F for 30 minutes to obtain best results.
- Using 0.1% soda ash (sodium carbonate) with **ECCOSCOUR™ GREENCLEANER DfE** will aid in grease removal if your water is acidic or hard with calcium and magnesium salts.

Synthetic Scour

- Use 0.05 - 0.50% **ECCOSCOUR™ GREENCLEANER DfE** on weight of bath.
- Adjust pH to 9.0 - 10.0 with soda ash (except for nylon or acrylic – keep pH around 7.0).
- Scour @ 105 – 145°F for 20-30 minutes to obtain best results.
