

ECCO™ FL YELLOW 3GL 7949

Water based fluorescent pigment dispersion for a variety of textile applications.

PHYSICAL PROPERTIES

Chemical Classification	-	Pigment dispersion
Appearance	-	Yellow liquid
pH	-	7 to 10
Solids (%)	-	45 +/- 3 units
Flash Point (approx)	-	Not applicable
VOC's (theoretical)	-	< 1%
Brookfield Viscosity (cps) Spindle #3 at 20 rpm	-	<1000
Specific Gravity	-	10 +/- 2.5%

STABILITY

- Completely stable at normal storage temperatures.
- Protect from freezing; may not tolerate freeze and thaw cycles.
- Shelf stability is expected at least for six months.
- Slight increase in viscosity does not have any influence on the technical properties.
