

## ORCOWET DSN™

ORCOWET DSN™ is an extremely fast anionic wetter for use in continuous dyeing and finishing, offering good bath stability in the pH range of 2 - 10. It can also be used in exhaust dyeing procedures as well.

### Physical Properties

Appearance	Clear to hazy pourable liquid
Odor	Mild
pH	Approximately 6
Ionic charge	Anionic
Solids	30 +/- 1%
Solubility	All proportions in water

### Applications

- WETTING
- DISPERSING
- SOLUBILIZING
- EMUSLSIFYING

### Procedures

In general, pre-dissolving in warm water will speed up solution make-up.

- Continuous dyeing and finishing wet-out : Use 0.1-0.25% on weight of bath(owb)
- Exhaust dyeing, wet out, and dispersing: Use 0.25-0.50% owb
