Technical Bulletin

Orcopal FUL™

Orcopal FUL™ is an economical wool fulling agent which is non-substantive to wool. **Orcopal FUL™** functions effectively with soda ash solutions and is effective in degreasing as it causes rapid wetting and emulsification of wool grease. Its use results in lower residual grease, softer hand, and improved static properties.

Physical Properties

Chemical Type	Ethoxylate blend
Appearance	Clear colorless medium-bodied liquid
Odor	None
Ionic Classification	Nonionic
Solubility	Dissolves easily in three times its weight of warm water(120°F(49°C))
рН	6 - 8 for a 1% solution
Specific gravity	8.42 lbs/gal

Applications

- Wool Fulling agent
- Wool Degreaser

Procedures

For initial trials, use 1-2 oz/gal of **Orcopal FUL™**.
