

ECCO AUXILIARY TLC 7865™

ECCO AUXILIARY TLC 7865™ is a water-based additive specifically designed to help prevent printing screens from clogging as a result of excessive drying rate.

ECCO AUXILIARY TLC 7865™ has no residual effect on color fastness when used as directed. It is effective at low concentrations, typically 1-5%, and is compatible with most water-based pigment dispersions.

Physical Properties

Appearance	Pale yellow, viscous liquid
Odor	Ammoniacal
Strain method	60 mesh
Density	8.5 lbs/gal +/- 5%
pH	8-10
Viscosity	10,000-20,000 (cps)
Solids	0.5-1.5%

Stability

- Stable for a minimum of six months after shipping date under normal storage conditions.
- Keep from freezing.
