

ECCO™ BLACK VB 7376

Pigment black anionic dispersion for use in printing, pad, spray, and exhaust application on a variety of substrates.

PHYSICAL PROPERTIES

Classification	-	Water-based pigment dispersion
Appearance	-	Black liquid
Odor	-	Ammoniacal
Dispersion type	-	Anionic
Particle Size (Hegman)	-	<1 μ
pH	-	8 to 10
Solids (%)	-	48 +/- 3 units
Viscosity-Brookfield (cps)	-	2000 -6000
Lbs / Gallon	-	9 +/- 5%
VOC's (theoretical)	-	<1%
Strain Method	-	Vortisieve, 325-mesh nylon screen
Strength Difference(%)	-	+/-5

STABILITY

- Stable for a minimum of six months after shipping date under normal storage conditions.
- Keep from freezing.
