

Orco Synthrowite OB™

Orco Synthrowite OB™ is an optical brightener for use on thermoplastics, acetate, ABS, PE, PP, PS, and PVC

Physical Properties

Appearance	White-light yellow powder
Chemical type	Benzoxazole
Color Index	184
Max UV Absorption(ethanol)	375 nm
Shade	Bluish white
Solubility	Soluble in fat, mineral oil, paraffin, wax, organic solvents

Procedures

For plastics, use 0.0001% - 0.001% for transparency and 0.01- 0.05% for whites and colors.

Storage

- Store in cool dry environment.
- Shelf life approximately two(2) years.
