

## ORCO™ Chroma-Key Video Green 5711E

**ORCO™ Chroma-Key Video Green 5711E** is a durable enamel paint specially formulated to meet the exacting video keying requirements mandated by professional movie special-effects videographers. Because of its durability and excellent coverage and texture characteristics, only one coat is typically required. This provides 600 ft<sup>2</sup> of coverage per gallon, more than twice the typical coverage using common vinyl acrylic type products, and is still water-soluble. We are a manufacturer, not a distributor.

### Physical Properties

Solvent	Water
Film Thickness	1 mil
Solids	58% +/-5%
Viscosity (Kreb Units -KU)	75 -85
pH Value	7.8 – 8.2
Cryptometer	12 – 14 / #3
Coverage	~600 ft <sup>2</sup> /gal
Available in 5, 30, & 250 gallons
