

Orco AntiMigrant™ V-1400

Orco AntiMigrant™ V-1400 is a synthetic antimigrant for use in continuous dyeing of pigments and disperse dyes.

Physical Properties

| | |
|----------------------|--------------------------|
| Appearance | pale yellow liquid |
| Ionic Charge | anionic |
| Chemical Type | polyacrylic acid |
| Solubility | All proportions in water |
| pH | 5.0-6.0 |

Advantages

- High efficiency
- Economical
- High color yield
- High bath stability
- Compatible with most binder systems

Procedures

Use 10-30 gm/L **Orco AntiMigrant™ V-1400**.

The actual amount required will depend on drying conditions, fabric, type of binder, and quantity of binder being used in system.
