

## Orco Antimigrant U-1300™

**Orco Antimigrant U-1300™** is an antimigrant for use in continuous dyeing of pigments and disperse dyes.

### Physical Properties

|                      |                          |
|----------------------|--------------------------|
| <b>Appearance</b>    | Pale yellow liquid       |
| <b>Ionic Charge</b>  | Anionic                  |
| <b>Chemical type</b> | Polyacrylic acid         |
| <b>pH</b>            | 4.5-5.0                  |
| <b>Solubility</b>    | All proportions in water |

### Advantages

- High efficiency / Low cost
- Good color yield
- Good bath stability
- Compatible with most binder systems

### Procedures

- Use 10-30 gm/L **Orco Antimigrant U-1300™**. The optimum amount will depend on drying conditions, fabric, type of binder, and quantity of binder being used in system.
