

Orco Dispersant 851™

Orco Dispersant 851™ is an effective dye bath dispersant for dyeing synthetic fibers with disperse dyes. It is particularly used in the nylon hosiery trade where uniformity and levelness are very important.

Physical Properties

Appearance	Straw-colored liquid
Ionic Nature	Nonionic
Chemical Nature	Polyethylene glycolmonotallate
Solubility	Dispersible
pH	6.5-7.0

Advantages

- Provides excellent leveling for dyeing nylon with disperse dyes
- Leaves the equipment clean
- Low foaming
- Gives lubricity to synthetic fibers

Procedures

Nylon Dyeing - Use 2% **Orco Dispersant 851™** on weight of fabric when dyeing nylon hosiery with disperse dyes.

Polyester Dyeing - Use 1% **Orco Dispersant 851™** on weight of fabric.
