

Orco Leveler T-330™

Orco Leveler T-330™ is an efficient leveler / retarder for wool and wool/nylon blends, and acrylic. Because of its high cloud point, **Orco Leveler T-330™** is especially useful for repairing unlevel dyeings at high temperatures(200-210°F(~96°C)).

Physical Properties

Appearance	Amber pourable liquid
Odor	Mild, slightly alcohol odor
Ionic Class	Cationic / Nonionic
pH (10% Solution)	8.5 – 10.0

Procedures

- Depending on class of acid dyes being used, and/or condition of wool or acrylic, a starting amount recommendation would be 0.75 - 2.0% **Orco Leveler T-330™** on weight of goods.
- In many cases when repair work is being performed, adjusting the pH to 6.0 - 7.5 in addition to using 2.0% owg **Orco Leveler T-330™** will help migrate the dye and re-level the shade.
