

Orco Low Crock T-550™

Orco Low Crock T-550™ is a specially formulated low-cure acrylic emulsion for use in all aqueous print systems offering excellent fastness on synthetics and synthetic blends and is designed to provide high degrees of wash and crock fastness without the need of adding thermosetting crosslinking agents.

Physical Properties

Appearance	Milky white emulsion
Ionic Class	Nonionic/Anionic
Solubility	All proportions in aqueous media

Advantages

- High wet fastness
- High crock fastness
- Low curing temperatures
- Ease of use
- Excellent printing characteristics
- Clean clear shades

Procedures

For best wet fastness, a 1 : 1 ratio of **Orco Low Crock T-550™** to **Orcobrite Pigment** is suggested.

Material is then dried after printing and cured at 250-275°F(120-135°C) for one minute.
