

## Orco Lubricant MC™

**Orco Lubricant MC™** is a lubricant and an antistatic agent used in all aqueous as well as oil-based oversprays. It provides fiber-to-fiber and metal-to-fiber lubrication as well as control over static formation.

### Physical Properties

<b>Appearance</b>	Amber yellow pourable liquid
<b>Odor</b>	mild pleasant aroma
<b>pH Stability</b>	2.5-12
<b>Ionic Nature</b>	Nonionic
<b>Activity</b>	100%
<b>Solubility</b>	Water dispersible; Solvent soluble

### Procedures

#### ***Aqueous Overspray***

Use a 0.5-2.5% solution in room temperature water.

#### ***Spinning/Carding Oil Additive***

Use 1.0-2.5% on weight of oil.

#### ***Finishing***

Due to **Orco Lubricant MC's** nonionic nature, it may be used in conjunction with both cationic and anionic fixing agents and/or resins to improve drape, napping, and hand properties.
