

Orco Nylosol Leveler ACN™

Orco Nylosol Leveler ACN™ is an efficient leveling agent for use on polyamides, especially those with varying dye affinity. Exhaust in most cases is virtually complete with excellent on tone buildup.

Physical Properties

Appearance	Amber fluid
Ionic Classification	Cationic / Nonionic
Solubility	All proportions in water
pH	8.5 – 9.0

Advantages

- Economical; Low percentage use required
- Good exhaustion
- Good transference at the boil

Procedure

- Use 3.0% **Orco Nylosol Leveler ACN™** on weight of goods applied in conjunction with other chemicals prior to dyes and allow to circulate for 10 minutes at 100-115⁰F.
