

## Orco Salt O Solution™

**Orco Salt O Solution™** is a specially compounded dyeing assistant used in all phases of textile dyeing and finishing. Orco Salt O Solution, when used in acid and disperse dye baths, functions not only as a dye leveler/migration promoter, but also helps to remove and disperse oil and grease contaminants commonly found on most synthetic and wool fabrics.

### Physical Properties

<b>Appearance</b>	Clear, yellowish liquid
<b>Classification</b>	polyethyleneoxycarbinol
<b>Charge</b>	Non-ionic
<b>Solubility</b>	All proportions soluble in water
<b>Solids</b>	30%
<b>pH</b>	6.7 - 7.5

### Procedures

As a leveling assistant during acid dyeing, feed 1 - 2% **Orco Salt O Solution™** on weight of goods into the kettle at the boil. This gives excellent leveling assistance to **Orcoacid™** and **Orcolan™** dyeings.

**Orco Salt O Solution™** is also an excellent product for prescouring or boil-off procedures.

**Orco Salt O Solution™** at a concentration of 1 - 2% on weight of goods is especially beneficial when used as a dyeing assistant for Acrilan carpet fibers giving level bright shades.
