

OrcoBrite WL™

OrcoBrite WL™ is an organic brightener which makes the colors on wool cleaner and brighter by removing the dulling impurities that naturally exist in wool. **OrcoBrite WL™** will not adversely affect wool strength, shade, lightfastness, or wash fastness but actually improves upon it.

Physical Properties

Appearance	White, free-flowing powder
Solubility	Soluble in all proportions in water

Applications

OrcoBrite WL™ is a good replacement for hydrosulfite bleaches which often deteriorate wool.

Procedures

Run woolen piece goods in a bath containing 2% - 4% **OrcoBrite WL™** on weight of goods(owg) for 10 minutes.

Add :

- 10% owg Glauber's Salt
- 5% owg Glacial Acetic Acid 56%

Run for 10 minutes and add dyes.

Raise temperature to the boil and run for one hour.

Rinse.

Notes

Protect from excessive heat and humidity.
