

FOR IMMEDIATE RELEASE

ORGANIC DYES and PIGMENTS (ORCO) ANNOUNCES PARTNERSHIP WITH
FARBENPUNKT GmbH

East Providence, RI, January 25, 2017 - Organic Dyes and Pigments LLC is proud to announce its exclusive partnership with Farbenpunkt GmbH to distribute through North and Central America the PERACTO Family of Nano Pigment Dispersions and Digital Printing Inks - specially formulated to provide unmatched color, adhesion, and wash-ability of fabrics for the digital textile printing and dyeing industry.

Since it was founded in 2012, Farbenpunkt GmbH has provided specialized technical solutions to some of the world's leading OEMs and end users in the digital textile printing and dyeing industries. An offshoot of these solutions is the PERACTO range of products, a new generation of dispersions and inks:

PeractoPad - Solves the issues of continuous dyeing with a simplified approach eliminating the need for steam chambers, pre-treatment and post-application washes and chemical rinses.

PeractoJet – Eliminates the need for pre or post-treatment commonly required in direct-to-fabric or direct-to-garment ink jet printing. PeractoJet simplifies the process by decreasing the dyes required and utilizes one set of inks for Polyester, Nylon, Cotton, and Blended fabrics.

PERACTO Products allow pad dyeing and printing in a simpler and more environmentally friendly manner. These products are designed to decrease wastewater and chemical usage while yielding excellent color fastness, wash-ability, and crocking.
