**ORCO BINDER GL™**

**ORCO Binder GL™** is a modified acrylic polymer for application as a binder and pretreatment for pigment exhaust dyeing.

**Properties:**
- **Appearance:** Milky white emulsion
- **Odor:** Mild acrylic odor
- **pH:** 4.0 - 5.0
- **Solids:** 24.0 - 26.0%
- **Ionic charge:** Cationic

**Procedures:**
Use 6 - 8% o.w.g. of **ORCO Binder GL™** and exhaust onto goods at 140°F for a period of 10 - 20 minutes. **ORCO Binder GL™** has also shown to fully exhaust over a wide temperature range, from 85°F to 140°F. Precise processing conditions should be determined based on equipment type, liquor ratio etc.

In cases where full exhaustion of the binder cannot be achieved by time and temperature alone, Soda Ash, at the levels of 1.0% o.w.g. may be used to enhance the substantivity.

**Uses:**
- May be pre-exhausted onto garments prior to pigment dyeing.
- Allows full exhaustion of pigment dyes for enhanced color yield.
- Excellent emulsion stability for clean running.
- Compatible with nonionic and cationic auxiliaries.
- May be used with alkaline exhaustion system.
- Enhances the performance of pigment pretreatment auxiliaries.
- Provides outstanding wash and crock fastness.
- Incorporates lubricant properties to reduce fabric pilling.
- Flexible application over a wide temperature range.

**Storage:**
Do not store at temperatures below 45°F.
