

## CELLAMINE SPECIAL NEW

**CELLAMINE SPECIAL NEW™** is an anionic co-polymerization of an alkyl-vinyl-ether solution product.

### Physical Properties

<b>Appearance</b>	Clear yellowish viscous liquid
<b>pH</b>	3.6 +/- 0.3 (2% solution)
<b>Solubility</b>	Easily soluble in warm water
<b>Density</b>	8.75 lbs/gallon

### Advantages

**CELLAMINE SPECIAL NEW** provides excellent gas fading resistance to treated fabrics as well as showing good stiffness properties and antistatic protection.

**CELLAMINE SPECIAL NEW** is also useful in reducing shrinkage and is non-chlorine retentive.

This product is extremely useful in treating narrow fabric and those elasticized narrow fabrics containing Spandex or Lycra.

**CELLAMINE SPECIAL NEW** may be applied to cellulosic, polyester and polyamide (Nylon) fabrics to obtain the gas fading protection properties on neutral un-dyed fabrics, which often discolor with exposure to the atmosphere. This protection is durable to laundering and dry cleaning

### Application

**CELLAMINE SPECIAL NEW** as supplied is easily soluble in room temperature or warmed water for the preparation of a finishing bath.

For gas fading protection, we suggest the use of approximately 3-5% of the **CELLAMINE SPECIAL NEW** in conjunction with added agents that may be required for stiffening or optical brighteners.

**CELLAMINE SPECIAL NEW** is completely compatible with polyvinyl acetate emulsion products such as **DURABOND 650™**.
