The List of Trade Names of Inert Ingredients database is intended solely to enhance public access to information related to the EPA approval status of trade name inert ingredients used in pesticide products. The user should be aware that while every effort is made to ensure that the information in the List of Trade Names of Inert Ingredients database is regularly updated and accurate, there are no express or implied guarantees. EPA encourages pesticide formulators to work closely with their suppliers to ensure that the formulators are fully aware of the EPA approval status of any substance being considered for use as an inert ingredient in a pesticide product prior to submission of an application for pesticide registration under FIFRA.
