

## OrcoTint™ NS Violet

**OrcoTint™ NS Violet** is a highly concentrated polymeric water-soluble liquid colorant designed for many applications such as detergents, fabric softeners, chemical compounding, ice-melt & deicing, and agriculture. The **OrcoTint™ NS** line of colorants is also a great tool for temporary product and process identification as they are easily rinsed off and non-staining to hands and other surfaces. **OrcoTint™ NS** colorants, commonly referred to as “non-staining”, are used extensively in chemical formulations such as detergents so that the medium being cleaned is not stained. This line of colorants is compatible with many systems due to its non-ionic chemical nature offering extended color stability and is commonly used for environmentally “green” applications. Beyond the standard **OrcoTint™ NS** line, custom-formulated colors can be developed according to your specific shade and physical property requirements.

0.0025% (25 ppm)

0.01% (100 ppm)

### Physical Properties

Appearance	Bluish violet liquid
Specific Gravity (g/cc)	~1.105
pH (neat)	2.1 – 3.5
