		Yellow 74	**Yellow 5G Conc**	7	6	Stable to 375° F
		No CI	**White SGL 8002**	8	8	Stable to 375° F

Actual dye samples should be evaluated in the chemical system or medium in which they are to be used for accurate shade and physical property results. Shades shown on print material and computer monitors are for general reference only as they are inherently inaccurate due to calibration variations and technical limitations of monitors and printers.
