Technical Bulletin

RAIN-OFF® A-1800

Modified resin base, durable water repellent and extender for fluorocarbon water repellent emulsions.

PROPERTIES

Appearance - Smooth off white emulsion.

pH (5% solution) - 6.5

Density - 8.5 lbs./gallon

Stability - Minimum 6 months

% Active - 25%

Solubility - Readily in water at room temperature.

GENERAL COMMENTS

RAIN-OFF® A-1800 is a resin based durable water repellent emulsion especially designed for use as an extender in the fluoro-chemical oil and water resistant finish. Extensive testing has proven this product to be an outstanding excellent extender for the following.

RAIN-OFF® A-1800 delivers excellent water repellent and stain resistant characteristics when used with typical Fluorochemical products.

RAIN-OFF® A-1800 is slightly cationic and is therefore compatible with typical fabric finishes.

RAIN-OFF® A-1800 exhibits good pad bath and processing stability in the presence of thermosetting resins and catalyst.

RAIN-OFF® A-1800 can give considerable savings by reducing the time for preparing the pad baths; eliminating steam and heat as required for other extenders, and shows improved performance and efficiency for less extender cost.

RAIN-OFF® A-1800 is also useful as a durable water repellent finish for application alone or with thermosetting resins an cottons, rayons, nylons and an appropriate metal salts catalyst.

APPLICATIONS

- To insure optimum wash fastness and dry cleaning fastness, the fabric should be thoroughly cleaned and rinsed to permit full absorbency of applied finish solutions.
- In application where the fabric is to be "napped" the use of RAIN-OFF® A-1800, without
 catalyst or curing, gives a most desirable hand and offers some lubricity to the napping
 operation.

Under normal padding conditions with a minimum of 75% wet pick-up, we suggest the following formulation for the use a water repellent of as an extender in fluoro-chemical applications:

- A. Oil and water stain repellent non- resinous formulation:
 - 10% RAIN-OFF® A-1800
 - 2 4% Fluorochemical Water/Oil
 - Mix well, apply by pad, foam or spray, dry cure at 270-330°F.

STABILITY

RAIN-OFF® A-1800 is considered stable for 6-9 months storage under normal conditions. Protection from freezing is necessary as successive freezing and thawing will cause the emulsion to deteriorate.
