

OrcoTerge™ Colorants for the HI&I Industries

OrcoTerge™ colorants are specialty dyes specifically selected for use in detergent applications for the carwash and Household, Industrial, & Institutional (HI&I) industries. These dyes have high stability properties that are required in many specialty soap and detergent formulations.

Actual dye samples should be evaluated in the chemical system or medium in which they are to be used for accurate shade and physical property results. Shades shown on print material and computer monitors are for general reference only as they are inherently inaccurate due to calibration variations and technical limitations of monitors and printers.
