

RAINOFF® A-1800

Modified resin base, durable water repellent. Fluorine Free

PROPERTIES

Appearance	- Smooth off white emulsion.
pH (5% solution)	- 6.5
Density	- 8.5 lbs./gallon
Stability	- Minimum 6 months
% Active	- 25%
Solubility	- Readily in water at room temperature.

GENERAL COMMENTS

RAINOFF® A-1800 is a resin based durable water repellent emulsion.

RAINOFF® A-1800 is slightly cationic and is therefore compatible with typical fabric finishes.

RAINOFF® A-1800 exhibits good pad bath and processing stability in the presence of thermosetting resins and catalyst.

RAINOFF® A-1800 is an excellent durable water repellent finish for application alone or with thermosetting resins on cottons, rayons, nylons and an appropriate metal salts catalyst.

APPLICATIONS

- To insure optimum wash fastness and dry cleaning fastness, the fabric should be thoroughly cleaned and rinsed to permit full absorbency of applied finish solutions.
- In application where the fabric is to be "napped" the use of **RAINOFF® A-1800**, without catalyst or curing, gives a most desirable hand and offers some lubricity to the napping operation.

STABILITY

RAINOFF® A-1800 is considered stable for 6-9 months storage under normal conditions. Protection from freezing is necessary as successive freezing and thawing will cause the emulsion to deteriorate.
